Mediator Style & Process Preferences

I consider myself to be extremely fortunate as I truly enjoy the work that I do. It is a privilege for me to have the opportunity to work with the brightest attorneys and the most interesting legal issues. As each mediation is unique, I attempt to approach each new opportunity with an open mind. For example, I do not insist on nor do I reject opening statements by the participants to mediation. When I receive a new mediation assignment it is generally my practice to contact the representatives of both parties individually to determine their relative experience with mediation, obstacles that they see to settlement and utilize the information provided to structure a mediation experience and process with the greatest likelihood of a success. I am often asked whether I am a facilitative, evaluative or transformative mediator. When I answer, I almost inevitably say "yes." This is because one or all of these techniques may be utilized during the course of the mediation. I think that it is always best to build upon success. From time to time, I will endeavor to utilize negotiation techniques that have proven to be successful, but I am not a mediator that will use the same technique or techniques in every mediation.
